## Risk Engineer Düsseldorf

Standing still is not an option in the current world of Insurance. TMHCC are one of the world's leading Specialty Insurers. With deep expertise in our chosen lines of business, our unparalleled track record and a solid balance sheet, TMHCC evaluates and manages risk like no one else in the industry. Looking beyond profit, empowering our people and delivering on our commitments are at the core of our customer values, and so is a desire to grow and provide creative and innovative solutions to our clients.

Just as we invest in our company, we invest in our employees' careers. We provide our employees a collaborative and rewarding environment within which to gain the knowledge, skills, and experience that lead to a rewarding career. Our products allow our customers to take on opportunity with confidence. In turn, our competitive salaries, attractive benefits, and potential for career growth allow you to take on opportunity with confidence.

### Your Purpose

As a member of our global Risk Engineering (RE) community, you will be fully embedded in the TME Japanese Business team. You will directly report to the Head of Risk Engineering mainland Europe. Our team mission is to provide first class Risk Engineering expertise while consistently providing added value for our clients.

Based on your skills, you will work closely with underwriters and business development teams across Europe to contribute to the sustainable growth of the TME Japanese Business portfolio through the provision of its risk engineering expertise. You will be embedded in the RE Europe team with a focus on our German book-of-business and also have the opportunity to service internal and external customers in other European regions.

You will deliver a comprehensive range of risk management and consulting expertise to match the unique risk profile of the local and worldwide operations of our Japanese clients. You will be involved in consulting to external projects, drive internal projects, develop and implement strategies, creating standard methodologies, guidelines, papers and/or leaflets as well as develop new innovative service offerings.

### Key Responsibilities

- Plan and carry out the necessary actions to provide cost effective, pragmatic solutions for our risk engineering service to TME Japanese clients; our portfolio consists of standard lines of business, principally Property, Casualty and Marine Cargo
- Identify, analyze the risk, and propose reasonable and realistic advice for the client to improve the risk or mitigate the potential of loss
- Compile and present risk engineering reports – this will include on site client visits and effective presentations
- Support TME's Japanese clients for any project that may have an impact on insured risks
- Develop guidelines, papers, leaflets and industry updates in relation to P&C risk management and emerging risk

### Your Profile

- Master's degree in Engineering with strong skills in Mathematics, Physics or Chemistry
- 5-7 years' experience in property risk prevention (manufacturing plants, warehousing, commercial businesses) – of which 3 to 5 years' experience gained working for an insurance company
- Be the force for a continuous optimization and safety of the processes
- Strong negotiation and presenting skills
- Able to work autonomously, making recommendations and any necessary decisions
- Strong interpersonal skills, both written and verbal
- Business sense and flexibility, self-managed and entrepreneurial attitude
- Proficient German and English
- Proficient digital literacy (e.g. Microsoft Office products) and ideally an affinity to digital solutions
- A natural team player with an aptitude to deliver high quality service
- Driver's license required and a willingness to travel – mainly within Europe

### Your Benefits

The Tokio Marine HCC Group of Companies offers a competitive salary and employee benefit package. We are a successful, dynamic organization experiencing rapid growth and are seeking energetic and confident individuals to join our team of professionals. The Tokio Marine HCC Group of companies is an equal opportunity employer. Please visit our website for more information about our companies.
